Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-9 and 11-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrases “the second cover portion” and “the second cover” in claims 2, 3, 5, 9, 11, 12, 14 and 18 lack proper antecedent basis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vasudeva (5,887,715). Vasudeva discloses a tool container comprising a case portion (1) having a storage space and a handle (2) and a cover portion (3, 46) pivotally attached to the case portion. The cover portion having an elongated storage space (41, 90) and a secondary cover portion (42) movably mounted with respect to the cover portion for covering the elongated storage space. Vasudeva also discloses the other limitations of the claims except for the handle being connected to the cover portion in lieu of the case portion. It would have been obvious to one having ordinary skill in the art at the time the invention was made in view of Vasudeva to provide the handle in the cover portion to facilitate carrying the tool container and since the selection of the

specific location for the handle such as connected to the cover portion as claimed or to the case portion of Vasudeva would have been an obvious matter of design choice inasmuch as the resultant structures will work equally well and inasmuch as applicant's specification does not state that using the specific location as claimed solves any particular problem or yields any unexpected results. The elongated storage space of Vasudeva is capable of holding a level and the weight of the secondary cover portion is tended to hold the secondary cover portion in its closed position.

5. Claims 10 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vasudeva (5,887,715) in view of Mitchell (4,058,210). Vasudeva discloses a tool container comprising a case portion (1) having a storage space and a handle (2) and a cover portion (3, 46) pivotally attached to the case portion. The cover portion having an elongated storage space (41, 90) and a secondary cover portion (42) movably mounted with respect to the cover portion for covering the elongated storage space. Vasudeva also discloses the other limitations of the claims except for the handle being connected to the cover portion in lieu of the case portion and a level being disposed in the elongated storage space. Mitchell shows a tool case having a small compartment for holding a small level (99) (Figures 4-5). It would have been obvious to one having ordinary skill in the art at the time the invention was made in view of Mitchell to modify the tool container of Vasudeva so it includes a level disposed in the elongated storage space to provide more convenience for the user and the handle is connected to the cover portion to facilitate carrying the tool container and since the selection of the specific location for the handle such as connected to the cover portion as claimed or to the case portion of Vasudeva

would have been an obvious matter of design choice inasmuch as the resultant structures will work equally well and inasmuch as applicant's specification does not state that using the specific location as claimed solves any particular problem or yields any unexpected results.

Allowable Subject Matter

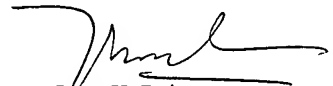

6. Claims 2-8 and 11-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
